

WIRELESS

at UMass Amherst

Updated September 2009

Two Ways to Connect

Choose **UMASS-SECURE1X** or **UMASS** from your list of available SSIDs (network names).

UMASS-SECURE1X

UMASS-SECURE1X is the **recommended** way to connect for students, faculty, and staff. *To connect, you'll first need to configure software on your laptop or other wireless device.*

UMASS

UMASS is the unencrypted, less secure, way to connect for students, faculty, staff, and campus guests.

For detailed instructions, see www.oit.umass.edu/network/wireless/

Key

-  Full Coverage (with some exceptions)
-  Partial Coverage (classrooms* and open areas)
-  Outdoor Coverage (approximate)

* officially recognized "classrooms" scheduled through the Registrar's Office

Look for Access Signs
